50X1-HUM

1. The first nickel-smelting furnace at the newly constructed plant at St. Egidien, near Glauchau in Saxony, went into operation on 13 July 1953. It is expected to produce 12.5 tons of the metal monthly; the ores to be worked are those produced locally.
2. Work on the construction of the second furnace began in July, but it is not expected to be in production before the beginning of 1954. Imported ores will probably be smelted in this furnace.
3. The technical director of the plant is Dr. Debuhr (fnu).
